

PROTECT YOUR GRAIN. PROTECT YOUR PRODUCTION.

PROFESSIONAL SILO & BAKERY CLEANING & FUMIGATION SOLUTIONS MOVING.

THE CHALLENGE

Stored product pests, dust, flour residue and product build-up can cause significant financial losses through contaminated grain, damaged ingredients, production delays and non-compliance with food safety regulations.

These conditions create favourable environments for stored product insect infestations by providing ideal breeding sites, shelter and readily available food sources. Left unchecked, infestations can spread rapidly throughout storage and production areas, compromising product quality, operational efficiency and food safety.

Without an integrated cleaning and pest management programme, contamination, insect infestations and poor hygiene can compromise product quality, disrupt operations, impact customer confidence and place compliance at risk.

Whether you're storing grain, milling flour or producing baked goods, protecting your products requires more than reactive treatments. It demands a proactive approach that safeguards every stage of the production process.

OUR INTEGRATED SOLUTION

Tsebo Cleaning & Hygiene, together with Flick Pest Control, delivers integrated cleaning and fumigation programmes for silos, bakeries and food manufacturing facilities.

Our specialist teams combine professional silo and production area cleaning programmes to remove dust, flour residue, product build-up and contamination, with targeted fumigation programmes that eliminate stored product pests before they impact your operations.

By combining proven cleaning methods, professional fumigation techniques and strict health and safety protocols, we help protect your products, maintain food safety compliance and support uninterrupted production from harvest through to finished product.

JUST ONE **FLICK** AND THEY'RE **GONE**.

WHY CHOOSE TSEBO?

More than cleaning. More than fumigation. One trusted partner delivering an integrated solution to protect your products, production and reputation.

- Integrated cleaning and fumigation solutions
- Professional silo and bakery cleaning
- Professional fumigation programmes
- Stored product pest management
- HACCP and food safety support
- Specialist confined-space expertise
- National service footprint
- Comprehensive reporting and compliance documentation
- More than 50 years of operational experience

OUR SERVICES

Specialist Cleaning

Professional dry and wet cleaning of silos, flour handling systems, bakery production areas and food manufacturing environments to remove dust, flour residue, product build-up and contaminants.

Professional Fumigation

Targeted fumigation programmes that eradicate stored product pests throughout every stage of their lifecycle while protecting product quality and supporting compliance.

Preventative Maintenance

Planned cleaning and fumigation programmes designed to reduce risk, prevent infestations and keep production running efficiently.

JUST ONE **FLICK** AND THEY'RE **GONE**.

BENEFITS

Protect Product Quality

Reduce the risk of contamination caused by dust, residues, flour build-up and stored product pests.

Improve Operational Efficiency

Maintain smooth production by preventing blockages, contamination and pest infestations that disrupt operations.

Support Food Safety Compliance

Help maintain hygienic production environments that support HACCP programmes, food safety standards and customer audits.

Reduce Downtime

Prevent costly production interruptions through planned cleaning and preventative fumigation programmes.

Protect Brand Reputation

Safeguard customer confidence by reducing the risk of contaminated products entering the supply chain.

Extend Asset Life

Routine cleaning helps minimise corrosion and deterioration while preventative pest management protects storage and production infrastructure.
